WORK EXPERIENCE

Software Engineering Manager, Wellhub - *May/2023 - present* - Porto, Portugal

- Leading a Platform Team owning core infrastructure services — multi-channel notifications (SMS, WhatsApp, email, push), a scheduled task management platform, a self-service serverless processor deployment platform, and a unified authentication & authorization layer featuring OTP and TOTP — used across the organization.
- *Technologies used:* Go, Kotlin, Kafka, Kubernetes, Redis, Postgres, Jira, AWS.

Senior Software Engineer, Alten Portugal - *Jun/2022 - May/2023* - Porto, Portugal

- Worked as a consultant for the client Bosch Security System as a member of the team responsible for the maintenance and development of new features to support the Home Security Cameras ecosystem.
- *Technologies used:* Java (8, 11), Kotlin, Spring Boot, WebFlux, JUnit (4, 5), REST, Maven, Gradle, MySQL, Wildfly, AWS (EC2, S3, Lambda, RDS), Jenkins.

Technical Leader, Mercado Livre Brasil - *May/2020 - Jun/2022* - São Paulo, SP - Brazil

- Responsible for mentoring team members, providing support in their tech learning path, helping to understand the used project stack, as well as soft-skills improvement.
- Working as a support for the project leaders with the responsibility to map, address or reduce possible impacts during the product improvement.
- Worked as a main developer in the team responsible for the supermarket product, developing and maintaining the services used to identify, list and connect buyers to that products, providing to them a customized experience on the company marketplace.
- Worked in the development of the feature that provides free shipping for buyers based on rules like, purchase minimum value and shipping address.

→ *Technologies used:* Java (8, 11, 17), Kotlin, REST, Spring 5, JUnit (4, 5), Jenkins, Gradle, Maven, MySQL, Docker.

Senior Software Engineer / Tech Lead, Apontador Busca Local - Jul/2016 - Apr/2020 - São Paulo, SP - Brazil

- Led the re-write and Migration of the Legacy Systems using the Spring 5, gRPC, GraphQL, Elasticsearch and Kubernetes as a container orchestrator.
- Worked in the development and maintenance of the platform, reducing the number of issues in the production environment and managing the framework upgrade of all backend applications.
- Defined the process of code reviewing and continuous delivery to test and productive environments;
- Implemented the process of code review, continuous delivery to the homologation and deployment process to the production environment.
- *Technologies used:* Java (6, 8, 11), Kotlin, JavaScript, JMS, REST, Spring (3, 5), JUnit (4, 5), Vue.js, AngularJS (1.x), HornetQ, RabbitMQ, Jenkins, Maven, Vert.x, Node.js, Solr, Elasticsearch, Redis, Oracle, MongoDB, Google Cloud, AWS (EC2, S3), gRPC, Docker, Kubernetes.
